Risk of formation of toxic pyrolysis products. Bursting aerosols can be forcibly projected from a fire. Advice for firefighters 5.3 Use self-contained breathing apparatus. Fire residues and contaminated firefighting water must be disposed of in accordance within the local regulations. Cool containers at risk with water spray jet. SECTION 6: Accidental release measures 6.1 Personal precautions, protective equipment and emergency procedures Keep away from all sources of ignition. Ensure adequate ventilation. Use personal protective equipment. **Environmental precautions** 6.2 Do not discharge into the drains/surface waters/groundwater. 6.3 Methods and material for containment and cleaning up Take up mechanically. Take up residues with absorbent material (e.g. sand). Dispose of absorbed material in accordance within the regulations. 6.4 Reference to other sections See SECTION 8+13 SECTION 7: Handling and storage Precautions for safe handling 7.1 Use only in well-ventilated areas. Provide suitable vacuuming at the processing area. Keep away from all sources of ignition - Refrain from smoking. Vapours can form an explosive mixture with air. Do not eat, drink, smoke or take drugs at work. After worktime and before work breaks the affected skin areas must be thoroughly cleaned. Use barrier skin cream. Take off contaminated clothing and wash before reuse. 7.2 Conditions for safe storage, including any incompatibilities Prevent penetration into the ground. Do not store together with oxidizing agents. Do not store together with food and animal food/diet. Keep in a cool place, heat causes increase in pressure and risk of bursting. Keep container in a well-ventilated place. Specific end use(s) 7.3 See product use, SECTION 1.2
